

# **SW Engineering CSC648/848 Fall 2024**

## **BRAIN BUFFS (Team 1)**

### **Milestone 2 Part I**

#### **Team Members:**

Shum Usami (susami@sfsu.edu)	Team Lead
Adharsh Thiagarajan	Frontend Lead
Devon Huang	Backend Lead
Kim Nguyen	GitHub Master
Thiha Aung	Software Developer

#### **Change History:**

<b>Date Submitted:</b>	Oct. 21, 2024
<b>Date Revised:</b>	

# 1. Executive Summary

Brain Buffs is a tutoring website by SFSU students for SFSU students. We understand what students want, a simple to use website to quickly search for someone who has experienced and excelled at the course that they are currently having trouble with.

Our functions shall be to allow SFSU students to browse for tutors and make it easy to register as a student and/or a tutor on our website. Users shall be able to create booking requests using their name and school email to contact tutors. Tutors shall be able to make tutor posts about what courses they are available to tutor for, which shall require approval from website admins. Tutors shall be able to check their dashboards for booking requests sent by users. These functions are uniquely specialized for SFSU students, only students with SFSU emails will be able to register and all the classes available for tutoring will be SFSU curriculum.

Brain Buffs is made up of SFSU students, Shun Usami, Adharsh Thiagarajan, Devon Huang, Thiha Aung, and Kim Nguyen, all of whom understand the importance of community-led academic success. Our goal for this website is to foster academic growth and collaboration among peers.

## 2. List of main data items and entities

### Defined Terms:

#### Guest

- Not Currently logged in.
- Can browse and **search** for tutors, it is not required to **login** for this feature.
- Can **login** or **register**.

#### User

- Represents anyone who has **registered** on the platform.
- Can be a student, a tutor, or both.
- Can create **booking requests**, browse and **search**.
- Can make a **Tutor posting** that would need to be approved by **Admin**.

#### Admin

- Manages and oversees the platform.
- Responsible for approving all **tutor postings** before they go live.
- Ensure that the platform's content is appropriate and compliant with the platform's policies.
- Can delete inappropriate **users** and **tutor postings**.
- Doesn't need **login**, manages through workbench.
- Can **ban** a user which will prevent them from logging in.

### Tutor Posting

- Application process offered by a **user** who wants to be a tutor.
- applicants can advertise their subjects, services, rates, a detailed description of their offerings, a profile picture for the **tutor posting** (the picture will be a .jpeg image stored in a file system), and their CV(must be uploaded as a .pdf file).
- Are visible to **users** and **guests** searching for tutors and are subject to approval by the **admin**.

### Booking Request

- Allows **users** to contact a tutor on the platform.
- Allow students to coordinate meetings.
- Is only seen privately by the tutor being requested.

### Dashboard

- Interface for registered **users** (both tutors and students).
- Tutors can view their scheduled sessions, while students can track their **booking requests** with tutors.

### Search

- This allows both unregistered and registered **users** to **search** for tutors based on tutor name, class subject, and rates.

### Registration

- Enables **guests** to sign up for the platform, providing name and student email to create an account (this information is stored in the database).

### Login

- A guest enters valid credentials (usually a student email and password) to access the platform as a **user**.
- After logging in, **users** gain full platform access and can interact with the site's features such as sending **booking requests** to tutors, viewing their **dashboard**, **searching** and browsing.
- Used by a pre-existing registered **user**.

### Banned User

- Shall not **login**
- Can search and browse

#### **Rating**

- **User** can leave a 1-5 star rating for tutor

### **Data Items:**

#### **User**

- email
- password
- name
- banned status

#### **Tutor Posting**

- creator (the user that is posting)
- profile picture (optional)
- CV (.pdf, optional)
- title
- subject name
- class number (SFSU specific class number)
- description
- pay\_rate

#### **Booking Request**

- sender (other user)
- receiver (other user)
- content

#### **Subject**

- subject name

## **3. Functional Requirements**

### **Priority 1**

- **Guests**
  1. **Search Tutor Postings:** Guests shall be able to search tutor postings based on subjects, class names, professor names, tutor names, and ratings.

- 2. **Browse Tutor Postings:** Guests shall be able to browse and view the search results of tutor postings.
- 3. **Register:** Guests shall be able to register an account using their SFSU email and password.
- 4. **Login:** Guests shall be able to login using their SFSU email and password.
- **Users (Students and Tutors)**
  - 5. **Inherit Guests Capabilities:** Users shall be able to do what guests can do except Register and Login.
  - 6. **Send Booking Request:** Users shall be able to send booking requests to tutor postings.
  - 7. **Create Tutor Postings:** Users shall be able to create new tutor postings with subjects, availability, rates, custom descriptions, and a PDF document.
  - 8. **Browse booking requests:** Users shall be able to browse the booking requests sent to their tutor postings.
- **Admin**
  - 9. **Approve Tutor Postings:** Admins shall be required to review and approve created or edited tutor postings before they go live.
  - 10. **Delete Inappropriate Users/Tutor Postings/Booking Requests:** Admins shall be able to delete users, tutor postings, and booking requests that violate platform policies.
  - 11. **Ban Inappropriate Users:** Admins shall be able to ban users that violate platform policies so that banned users shall not be able to login.

## Priority 2

- **Guests**
  - No requirements
- **Users (Students and Tutors)**
  - 12. **Edit Tutor Postings:** Users shall be able to edit the existing tutor postings.
  - 13. **Logout:** Users shall be able to log out from their account.
  - 14. **View banned status:** Users shall be able to view their banned status if they are banned.
- **Admin**
  - No requirements

## Priority 3

- **Guests**
  - No requirements
- **Users (Students and Tutors)**
  - 15. **Delete Tutor Postings:** Users shall be able to delete the existing tutor postings.
  - 16. **Schedule Sessions:** Users shall be able to request sessions integrated into tutor profiles.

**17. Rate Tutors:** Users shall be able to leave ratings and reviews for tutor postings.

**18. Unregister:** Users shall be able to unregister their account.

- **Admin**

No requirements

## 4. UI Storyboards for each main use case

### Case 1: Student Schedules a Tutoring Session:

Users shall be able to search for available tutors on the website based on SFSU-specific classes without the need to log in or register. For example, CSC 510 is the SFSU specific class to ensure browsing class is exclusive for only the SFSU community.

Submit Request

## Case 2: Users create account and login to book tutoring sessions

Users shall be able register accounts and login on Brain Buffs to complete the booking sessions, manage their booking requests.

Brain Buffs	<div style="border: 1px solid #ccc; padding: 2px; display: inline-block;">ALL ▼</div> <div style="border: 1px solid #ccc; width: 150px; height: 20px; display: inline-block; margin-left: 5px;"></div> <div style="text-align: right; padding-right: 5px;">🔍</div>	<div>SFSU-CSC640-Team 1</div> <div><a href="#">Become a Tutor!</a></div>
<h2>Welcome Back</h2> <p>New? <a href="#">Register</a></p> <div style="margin: 20px auto; width: 250px;"><div style="border: 1px solid #ccc; padding: 10px; margin-bottom: 5px;"><i>SFSU email</i></div><div style="border: 1px solid #ccc; padding: 10px; margin-bottom: 5px;"><i>Password</i></div><div style="border: 1px solid #ccc; padding: 10px; text-align: center;"><a href="#">Login</a></div></div> <p style="margin-top: 20px;"><a href="#">Forgot your password?</a></p>		

Only users with SFSU.edu email addresses can register, ensuring the platform is exclusive to the SFSU community.

<b>Brain Buffs</b>	<div style="display: flex; align-items: center;"><div style="border: 1px solid #ccc; padding: 2px 5px; margin-right: 5px;">ALL ▼</div><div style="border: 1px solid #ccc; flex-grow: 1; position: relative;"><div style="position: absolute; right: 5px; top: 5px; font-size: 0.8em;">🔍</div></div></div>	<b>SFSU-CSC640-Team 1</b> <b>Become a Tutor!</b>
<h2>Create an Account</h2> <p>Have an account? <a href="#">Login</a></p> <div style="margin: 20px auto; width: 50%; border: 1px solid #ccc; padding: 10px;"><div style="border-bottom: 1px solid #ccc; padding-bottom: 10px; margin-bottom: 10px;"><i>Name</i></div><div style="border-bottom: 1px solid #ccc; padding-bottom: 10px; margin-bottom: 10px;"><i>SFSU email *</i></div><div style="border-bottom: 1px solid #ccc; padding-bottom: 10px;"><i>Password*</i></div></div> <div style="text-align: center; margin: 20px auto; width: 50%;">Accept the terms and conditions <input type="checkbox"/></div> <div style="margin: 20px auto; width: 30%; text-align: center;"><div style="border: 1px solid #ccc; padding: 10px 20px; display: inline-block;"><b>Submit</b></div></div>		

### Case 3: User wants to become a Tutor on Brain Buffs

Faculty recommends students to use Brain Buffs for Tutoring Support and also encourages high-performing students to become tutors on Brain Buffs. Users shall be able to apply to become paid tutors on Brain Buffs within this page.

<b>Brain Buffs</b>	ALL ▼ <input style="width: 80%;" type="text"/>	SFSU-CSC640-Team 1 <b>Become a Tutor!</b>
<h2 style="margin: 0;">Wanna be a Tutor?</h2> <div style="border: 1px solid black; padding: 10px; margin: 10px auto; width: 60%;"><div style="border-bottom: 1px solid black; padding: 5px 0;"><i>Subject*</i></div><div style="border-bottom: 1px solid black; padding: 5px 0;"><i>Course#</i></div><div style="border-bottom: 1px solid black; padding: 5px 0;"><i>Description</i></div><div style="display: flex; justify-content: space-between; padding: 5px 0;"><span><i>Pay Rate</i></span><span><i>\$ / hr</i></span></div></div> <div style="margin: 10px auto; width: 60%; text-align: center;"><div><u>Attach</u> cv</div><div><u>Upload</u> Profile Picture</div></div> <div style="display: flex; justify-content: space-between; align-items: center; margin: 10px 0;"><span>May take up to 24 hours to approve</span><input style="width: 40px; height: 20px;" type="checkbox"/></div> <div style="margin: 20px auto; width: 40%; text-align: center;"><div style="border: 1px solid black; padding: 10px 20px; display: inline-block;"><b>Submit</b></div></div>		

## Case 4: Tutor Updates Availability and Manages Sessions

Once they are qualified, tutors shall be able to manage the booking requests.

## 5. High level Architecture

### a. DataBase Organization

#### user

- **PK** user\_id
- email
- password
- name
- is\_banned - status indicating if was banned by **admin**
- created\_at
- updated\_at

#### tutor\_posting

- **PK** post\_id
- **FK** user\_id
- **FK** subject\_id
- profile\_picture
- CV
- class\_number
- pay\_rate
- description
- wage
- approved - status indicating if it was approved by **admin**
- created\_at
- updated\_at

#### booking\_request

- **PK** booking\_id
- **FK** sender\_id
- **FK** receiver\_id
- content
- approved - status indicating if it was approved by **admin**
- created\_at
- updated\_at

#### subject

- **PK** subject\_id
- subject\_name

## **b. Media Storage**

- Photos and media will be stored directly in the remote server

## **c. Search/filter architecture and implementation**

- SQL precise search with %like search on text field e.g. subject + class number
- Filter will be a drop down selection of all/subjects

# **6. Key risks**

## **1. Skills Risks**

- **Risk:** Some team members may not have sufficient experience with the specific technologies and frameworks we are using, potentially leading to delays in development.
- **Plan:** Organize training sessions and workshops to upskill team members on necessary technologies. Additionally, consider pairing less experienced members with those who have more expertise for mentorship.

## **2. Schedule Risks**

- **Risk:** Meeting the Milestone 2 deadline is challenging due to workload from other classes and limited development time.
- **Plan:** Prioritize tasks by focusing on critical features and use Agile sprints to track progress, ensuring key tasks are completed on time.

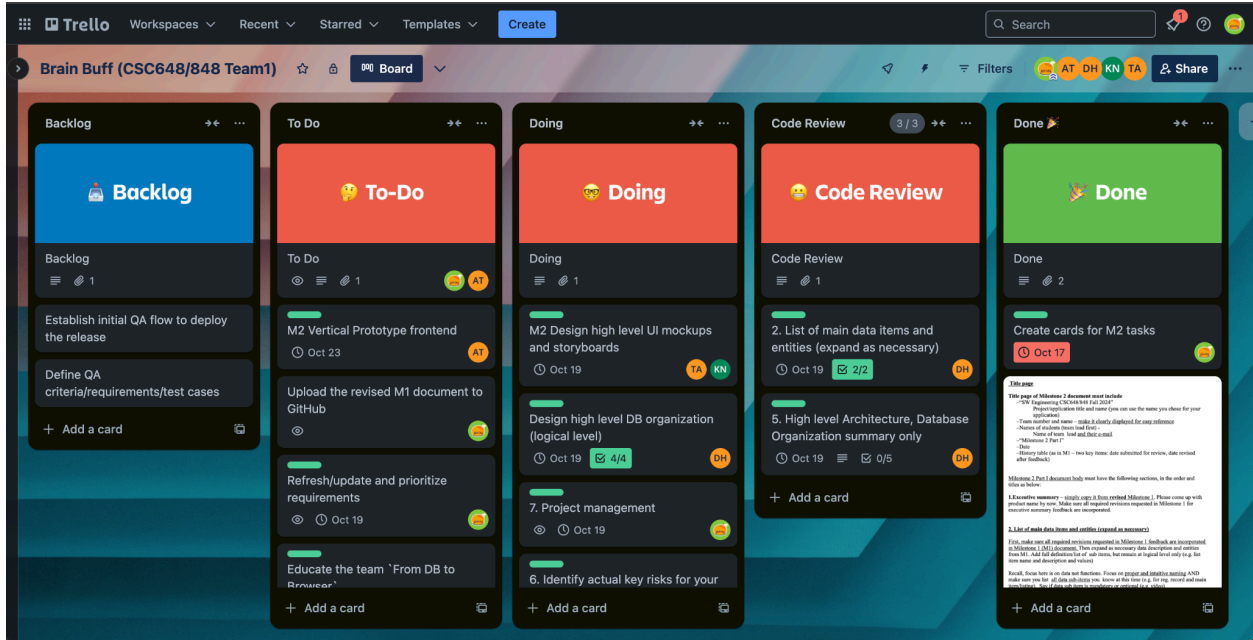

## **3. Teamwork Risks**

- **Risk:** Communication gaps among team members may have led to misunderstandings regarding project responsibilities and expectations.
- **Plan:** Facilitate more on Discord and coordinate if there is a task and needs someone else to look over.

# **7. Project management**

For Milestone 2 and future tasks, we transitioned from GitHub Issues to Trello for task management. The team lead creates task cards on Trello, assigns them based on team members' skills, and sets deadlines. Team members may break tasks into smaller subtasks as needed.

We use Trello boards structured into **Backlog**, **TODO**, **Doing**, **Code Review**, and **Done** to track progress. Regular check-ins help ensure tasks stay on schedule.

## 8. Use of GenAI Tools like ChatGPT and Copilot for Milestone 2

### Tools being used:

- ChatGPT (Version 4)
- Figma

### Tasks and Usefulness:

#### 1. Creating UI Mockups

- **Usefulness: MEDIUM**
- While the main tool used was Figma, ChatGPT provided useful suggestions for structuring the **login and registration pages** by describing common UX patterns. This input helped streamline the wireframe creation process, focusing on usability and SFSU-specific requirements.

#### 2. Refining Functional Requirements

- **Usefulness: HIGH**
- ChatGPT helped break down complex user stories into smaller, manageable requirements, particularly for **SFSU-specific search functionalities**. This ensured that the team captured all essential details while improving clarity and alignment with project goals.

### 3. Identifying Key Risks

- **Usefulness:** MEDIUM
- ChatGPT was used to brainstorm potential risks for the project, such as **schedule slippage** and **integration challenges** between the front-end and back-end teams. This allowed the team to outline clear mitigation strategies and stay proactive in addressing these risks.

## Key Examples and Prompts:

### 1. Task: Brainstorming SFSU-specific features.

- **Prompt:** "Suggest features for a university-specific tutoring platform."
- **Output:** "The platform could include features like filtering tutors by course or department, a built-in messaging system, and the ability to view tutor availability based on the university's class schedule."

### 2. Task: Drafting an executive summary.

- **Prompt:** "Draft an executive summary for a tutoring web application targeting SFSU students."
- **Output:** ChatGPT produced a clear and concise executive summary, highlighting the platform's unique features and its benefits for SFSU students.

## Additional Insights:

- **Speed vs Accuracy:** While these tools significantly sped up the workflow, there was a need to thoroughly review and test the generated output, particularly for code snippets, to ensure they met the project's specific requirements.

## 9. Team Lead Checklist

So far all team members are fully engaged and attending team sessions when required	
Team ready and able to use the chosen back and front end frameworks and those who need to learn are working on learning and practicing	 (working on)
Team reviewed suggested resources before drafting Milestone 2	
Team lead checked Milestone 2 document for quality, completeness, formatting and compliance with instructions before the submission	
Team lead ensured that all team members read the final Milestone 2 document	

and agree/understand it before submission	
Team shared and discussed experience with genAI tools among themselves
